

## THE CLAIM

What I claim as my invention is a point scoring format for scoring golf accuracy excellence; where players play to win holes by hitting either a single fairway and /or green, or where par for each hole is determined by a regulated number of strokes a player is allowed to take to hit fairways and /or greens; i.e., (standard 9-18 Hole golf course), all Par 3 Holes become Par 1 Holes, i.e., Tee ball lands on the green; player earns 1 point, and all Par 4 Holes become Par 2 Holes, i.e., Tee ball lands in a fairway; 2<sup>nd</sup> shot/ball lands on the green; player earns 2 points, and all Par 5 Holes become Par 3 Holes, i.e., Tee ball, and 2<sup>nd</sup> shot/ball in the fairway; 3<sup>rd</sup> shot/ball on the green; player earns 3 points; therefore, any player that hits more fairways and /or greens in regulation has earned more points, or wins more holes than their opponents, and is declared the winner.
